Re: Letter of Recommendation:

Dear Steve,

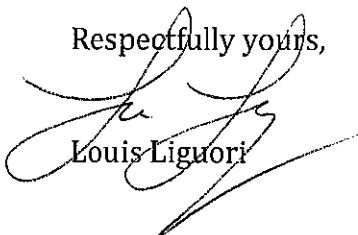

I would like to take this opportunity to thank you and your professional technicians for the HVAC services you have provided to us here at Habitots Preschool and Child Care Centers for both our locations within the Middle Island and Medford communities.

As you are well aware of all the compliance issues we have to deal with from running our centers and providing care for hundreds of children that attend our centers. It is very comforting for us to have your company servicing all of our HVAC equipment needs.

We are extremely thankful for you companies performance with respect to the installation of the HVAC equipment at our new childcare center in Middle Island. During the construction both I and my general contractor never had any issues with respect to the HVAC installation. There were no delays; the work was professionally installed by your technicians. The common phrase both me and my CG had with respect to your companies installation was, " I never have to call them, they always seem to know when to show up and continue with their installation, you didn't even realize they were on the job site. They just went about their business with the installation. " I can honestly say that you cannot say that about most contractors.

Once again thank you for working with us here at Habitots and providing us with all the technical assistance with respect to our facilities and our HVAC needs.

Respectfully yours,

Louis Liguori
